Integrated Manual Therapy and Orthopedic Massage for Upper Body Conditions

Based on revolutionary clinical research, participants will learn new techniques that will forever change the way they approach myofascial, trigger point, and tendon pain. These innovative structurally oriented routines, offer pain-free multi-modality methods for achieving immediate results from the following clinical conditions: Rotator cuff injuries, shoulder impingement, bursitis, pectoralis minor strains, bicipital tendinitis, rhomboid pain, thoracic outlet, cervical sprains and strains, whiplash, atlas/axis & C1/C2 mobilization, facet joint dysfunctions, migraine headaches, bulging discs, medial and lateral epicondyle pain, De Quervain's tenosynovitis, carpal tunnel syndrome, trigger finger, and joint arthritis. Ground-breaking Frozen Shoulder and Hip Capsule Adhesion techniques will highlight this dynamic interactive workshop. This incredible multimedia presentation, consisting of assessments, treatments, and client self-care for chronic pain and sports injuries, will facilitate permanent results, even in the most complicated clinical conditions.
