Soft Tissue Release is a very effective technique to help people in pain. It involves client movement to enhance the effectiveness of your treatments.

Soft Tissue Release involves working into a muscle while stretching it, either passively or actively. Once the principles are understood it is easy to apply this technique anywhere in the body. Tips and tricks for body mechanics and positioning will be shown to make it easy for the therapist.

Extensive notes will be provided with this class. Please bring shorts and a sports bra for women.
